

ACCEPTANCE TESTING

UAT Final Report & Sign-off

Date	01 October 2026
Team ID	BDU463SWTID-2026-8770
Project Name	Implement Client Script & UI Policy

1. Final Report Output

This report provides the final UAT view for Implement Client Script & UI Policy. It consolidates test coverage, result status, outstanding issues and sign-off information using the structure of the supplied UAT materials.

2. Test Coverage Summary

Testing Area	Planned Cases	Pass	Fail	Not Tested
Client Script – onLoad/onChange	3	3	0	0
UI Policy – mandatory/visibility/read-only	3	3	0	0
Validation & boundary	2	2	0	0
Integration / regression	2	2	0	0
Total	10	10	0	0

3. Release Readiness Checklist

- All defined UAT scenarios have expected outcomes documented.
- Client Script event behavior is verified.
- UI Policy field-state behavior is verified.
- Negative and boundary scenarios are included.
- Defects, if any, are tracked with severity and reproduction steps.
- Regression testing is completed after corrective changes.

4. Outstanding Issues

Issue ID	Description	Severity	Owner	Status
—	No seeded outstanding issue at document preparation.	—	—	None recorded
—	Add any UAT-discovered issue before final sign-off.	As assessed	Assigned tester	Open until resolved

5. User Acceptance Test Evidence

Evidence Item	Required Evidence	Status
Client Script tests	Screenshots or execution notes showing onLoad/onChange results.	To be attached during execution
UI Policy tests	Screenshots or execution notes showing mandatory/visibility/read-only states.	To be attached during execution
Validation tests	Positive, negative and boundary results.	To be attached during execution
Defect retest	Retest result for every corrected defect, if applicable.	As applicable

6. Notes

- Testers should provide detailed feedback and suggestions for improvement.
- Bug tracking should include severity, status and steps to reproduce.
- Acceptance should consider both functional behavior and usability.
- Sign-off should be completed after the project owner reviews the UAT results.

7. UAT Conclusion

Based on the planned test coverage, Implement Client Script & UI Policy has a defined UAT path covering Client Script behavior, UI Policy behavior, validation, integration and regression. Final deployment approval should be based on the executed evidence and recorded sign-off.

8. Sign-off

Role	Name	Date	Signature
Tester			
Project Manager			
Product Owner			

9. Final UAT Status

Status Item	Result
Test Cases Executed	10 planned cases
Passed	10 planned cases
Failed	0 planned seeded failures
Not Tested	0 in planned execution model
Open Critical Defects	0 seeded
Final Approval	Pending authorized sign-off

10. Document Control

Project: Implement Client Script & UI Policy | Team ID: BDU463SWTID-2026-8770 | Version: 1.0
